They will look like submarines when I begin to fly.
Five or six big motors that will make the thunder roar.
I will build an airship that will travel thru the air.
When I meet that Halley comet I will set the pace.
At a thousand miles an hour I'll do it I declare.
For I'm going together to St. Peter's place.
CHORUS Moderato

Want to take a trip to heaven in an airship before I die. Oh I want to take a trip to heaven and to fly right thru the sky.

Flying Around the Stars
I will make a call on Venus

Stop and get my gasoline at Mars For I

want to take a trip to heaven and go

flying around the stars.
